PROFILE

In the field of frontend development, I work with JavaScript, React, Vue.js, and CSS/SCSS/Tailwind. I have knowledge of SQL and experience in backend development using PHP and Laravel. I use GitHub for version control. I completed a 3-month internship at EpolSoft as a Frontend Developer (React). From February 2023 to February 2024, I worked at Encore Studio as a Junior Full Stack Developer, where I optimized Laravel applications and developed frontend components using JavaScript and Vue3. Currently, I am a Frontend Developer and Designer at Planetor, a game in Telegram Mini Apps, where I focus on building and designing user interfaces with Vue3, Three.js, JavaScript and Tailwind.

EMPLOYMENT HISTORY

Feb 2023 – Feb 2024 | **Junior Full Stack Developer, Encore Studio** | Brest

Tech stack: Laravel, Vue.js, JavaScript, Tailwind.
- Optimized existing Laravel application to improve performance and scalability.
- Designed and implemented new frontend components.
- Developed 100+ dusk tests for a project.
- Worked closely with designers and other developers to ensure timely delivery of a project.

Feb 2024 – present | **Frontend Developer, Planetor** | Brest, Warsaw

Tech stack: Vue.js, Three.js, JavaScript, Tailwind.
- Development and implementation of the entire user interface, from design to final deployment.
- Designing and optimizing application interfaces.
- Integrating the frontend with the backend, maintaining seamless interaction with server-side components.
- Adapting web applications for mobile devices and ensuring cross-browser compatibility.
- Continuously improving user experience based on user feedback.
